

High Power Fiber Collimator With Isolator (Up to 50W CW) (patents pending)

Product Description

The FSOI Series TGG-based high power isolator is a passive device that transmits high power light from input fiber into an output collimated light beam into free space while blocking the unwanted light from back reflection and scattering. Agiltron's proprietary magnetic-optics technology and advanced micro-optic package technique enable industrial leading performance. Agiltron currently provides a full range of polarization-independent, polarization maintaining, and custom design versions with a broad wavelength coverage and various output beam diameters. We have experience to incorporate special fibers.

Features

- High Power Handling
- High Isolation
- High Reliability
- Low IL, PDL & TDL
- Cost Effective

Performance Specifications

FSOI High power Isolator	Min	Typical	Max	Unit
Operation Wavelength	1054	1064	1074	nm
Insertion Loss		0.6	0.8	dB
Isolation***	22	27		dB
Polarization Dependent Loss		0.1	0.2	dB
Polarization Mode Dispersion		0.1	0.2	ps
Return Loss	45	50		dB
Optical Power Handling**			50	W
Beam Size	0.6		1	mm
Fiber Type	See Order Information			
Loss Stability		0.2 (15W/CW)		dB
Storage temperature		-10 to 60		°C
Storage Humidity		5% to 95% (No Condensation)		
Package Dimension (Body)		68x34x33		mm

Note:

- * Measured without connectors
- ** Continuous operation, for pulse operation call
- *** Back Reflect <10%. For >10% application, please call us.

Applications

- Laser Pump Source
- Optical Fiber Amplifier
- Laser Manufacturing
- laser Marking

High Power Fiber Collimator With Isolator

(50W CW) (patents pending)
