Multimode 50/125µm, up to 100mW, 0.2nm linewidth

### DATASHEET

Features

- 1390nm Diode Laser
- Multimode 50/125µm Fiber
- Coaxial

# **Applications**

- Analog/digital optical transmission
- CATV reverse transmission
- Others

# ATTENTION OBSERVE PRECAUTIONS FOR HANDLING ELECTROSTATIC

The FCML series diode lasers deliver up to 100mW of power through a 50/125µm fiber. They feature built-in optical isolator, low capacitance and low dark current, high stability, low threshold current, low operating current, integrated high isolation, and low insertion loss.

# Specifications

Parameter	Min	Typical	Max	Unit
Optical Output Power		10	100	mW
Threshold Current		5	15	mA
LD Forward Current (10mW CW)			120	mA
LD Forward Voltage		1.0	1.2	V
LD Reverse Voltage			2	V
Center Wavelength@25°C	1387	1390	1393	nm
Spectral Linewidth (FWHM)		0.2	1.0	nm
Side-mode Suppression Ratio		35		dB
Modulation Frequency		2.5	5	GHz
PD current	100		1000	μΑ
Dark Current of PD			100	nA
PD Reverse Voltage			15	V
Relative Intensity Noise		-155	-150	dB/Hz
RF Bandpass Flatness		±1.5		dB
Operating temperature (heatsink temperature)	-40		+85	°C
Storage Temperature	-40		+100	°C
Lead Soldering Temperature			260 (10s)	°C

**Note:** The specifications provided are for general applications with a cost-effective approach. If you need to narrow or expand the tolerance, coverage, limit, or qualifications, please [click this <u>link</u>]:

## DATASHEET

### Benchtop Matching Laser Diode Driver

Agiltron cost-effective LDCB series benchtop control kit is designed for easy laser diode mounting and precise control. It incorporates a high-precision, low-noise auto-feedback drive electronics to ensure constant output power or a constant driving current and an integrated temperature control unit maintains optimal operating conditions. The system provides up to 1A driving current and up to 2A TEC cooling current. Each system features a front fiber output connector. The user interface includes an intuitive LCD display for independent control of output power and temperature via two front rotating knobs. The LDCB also includes a universal power supply compatible with 100 to 240 VAC. The LDCB has a built-in isolator option to prevent reflection-induced laser emissions instability. The LDCB is designed as a laser diode and TEC controller kit for customer to install laser diode. It has three types of pluggable laser mounts of butterfly, DIL, and TOCAN. The TOCAN mount contains an external TEC that maintains a constant temperature for wavelength stability.

For details please click: https://agiltron.com/product/laser-diode-tec-controllers-benchtop-kit/

#### **Turn-Key Module Matching The Laser Diode**

The Agiltron LDCM series laser source module is designed for OEM applications and features all-in-one high reliability and highly stable laser output. The LDCM contains highprecision, low-noise, auto-feedback laser diode drive electronics to ensure constant output power or driving current and an integrated temperature controller that maintains optimal operating conditions. An optional fiber optical isolator can be integrated to prevent reflectioninduced laser emission instability, which is essential for achieving highly stable lasers. Agiltron produces isolators from 370nm to 2600nm. The system provides up to 1A driving current and up to 2A TEC cooling current. Each unit features a single FC/APC connector output and two front rotating knobs for independent setting of laser output power and temperature. A toggle switch allows selection between constant current control mode and feedback constant output power mode.

#### Laser Driver Kit

Agiltron cost-effective LDCD series module control kit is designed for easy laser diode mounting and precise control. It incorporates a high-precision, low-noise auto-feedback drive electronics to ensure constant output power or a constant driving current and an integrated temperature control unit maintains optimal operating conditions. The system provides up to 1A driving current and up to 2A TEC cooling current. It has three types of pluggable laser mounts of butterfly, DIL, and TOCAN. The TOCAN mount contains an external TEC that maintains a constant temperature for wavelength stability. It comes with cables to connect between the mounting module to the driving module, making integration convenient.

### DATASHEET

#### Caution Electrostatic Sensitivity

- Never touch laser diode and the module using hands
- Always use protections when handle a laser diode
- Recommend mounting the laser diode using an ionic gun and ESD finger cots

### **Laser Safety**

This product meets the appropriate standard in Title 21 of the Code of Federal Regulations (CFR). FDA/CDRH Class 1M laser product. This device has been classified with the FDA/CDRH under accession number 0220191. All versions of this laser are Class 1M laser products, tested according to IEC 60825-1:2007 / EN 60825-1:2007. An additional warning for Class 1M laser products. For diverging beams, this warning shall state that viewing the laser output with certain optical instruments (for example eye loupes, magnifiers, and microscopes) within a distance of 100 mm may pose an eye hazard. For collimated beams, this warning shall state that viewing the laser output with certain instruments designed for use at a distance (for example telescopes and binoculars) may pose an eye hazard.
