30GHz Transmitter/Receiver RF over Fiber Low Noise High SFDR

0.01 – 30 GHz Analog

DATASHEET

Return to the Webpage

The LRFF series is a family of low-noise analog RF-over-Fiber (RFoF) transmit/receive links designed for long-distance transport of wideband RF signals with minimal degradation. These links offer a high spurious-free dynamic range (SFDR), enabling simultaneous transmission of multiple signals with widely varying power levels while maintaining excellent noise figure (NF) performance. High-SFDR operation reduces the need for heavy front-end signal conditioning, avoiding gain compression issues and simplifying separation of true signals from spurious artifacts. The transmitter uses a narrow-linewidth, high-side-mode-suppression laser coupled with an external $LiNbO_3$ modulator biased for high linearity, with a built-in RF pre-amplifier to improve NF and link gain. External modulation also supports WDM operation with up to 98 channels. The receiver includes a post-amplifier to boost RF output levels. The Tx and Rx are connected via customer fiber, with a circulator-based cable option enabling bidirectional operation. These high-performance links excel in applications requiring high SFDR—such as antenna testing, radar and communication test ranges, DF/ELINT systems, civil communications, antenna remoting, telemetry, and satellite communications—where strong jammers or large main-to-sidelobe power ratios coexist with weak signals of interest. For maximum SFDR performance, the L-series (Low Noise) products are preferred over the Q-series (standard).

Features

- Up to 30GHz
- SM28 Fiber
- Low Loss
- Low Cost
- Stable

Applications

- GSM Repeater
- CDMA Repeater
- WCDMA Repeater
- PHS Repeater
- Digital TV Repeater
- Broadcast Repeater

Note: The specifications provided are for general applications with a cost-effective approach. If you need to narrow or expand the tolerance, coverage, limit, or qualifications, please [click this link]:

Specifications

Parameter	Min	Typical	Max	Unit
Frequency Range [1]	0.01		30	GHz
RF Gain [2,3]		-18		dB
Gain Flatness for the entire frequency range [4]		±4		dB
1dB Input gain compression point [3]		12		dBm
Noise Figure [2,3]		28		dB
SFDR (calculated) [3,5]		112		$dBm/H^{2/3}$
Maximum RF input level (No damage)		16		dB
VSWR Input		2:1		-
VSWR Output		2:1		-
Spurious [4]		≤ -90		dBc
Phase Noise at 10KHz Offset		≤ -130		dBc/Hz
Input / Output impedance		50		Ω
Laser diode optical wavelength		1.55		µm
Receiver photodiode optical wavelength	1.5		1.58	µm
Operating temperature range	0		+70	°C
Storage temperature	-40		+85	°C
LED status indicators (Tx/Rx)		Blue/Green/Red		-
Input voltage [7]		5		VDC
Power consumption Tx module [8]		2		W
Power consumption Rx module [8]		0.25		W
RF Input / Output connectors		SMA		-
Optical Connector		FC/APC		-
Power connector and Data/monitor connector [9]		DB15		-

Notes:

[1]. Extended low frequency 0.1-30 GHz is optional.
[2]. Excluding customer fiber loss.
[3]. Measured at 20GHz. Typical values of Gain, P1dB and NF with Pre/Post Amps are indicated in the table below.
[4]. Each of the pre/post amplifiers (optional) add about ±1.5dB to the gain flatness.
[5]. Excluding in-band harmonics. SFDR (calculated) ≈ $2/3x[(IP1dB+10)+174-NF]$ $dB/Hz^{2/3}$.
[6]. Measured with input signal at Ip1dBc - 3dB at 1GHz. Ultra with 28dB post amplifier spurious level is about -85dBc
[7]. Recommended Power Supplies: Meanwell P/N GSM25U05-P1J (USA); GSM25E05-P1J (Europe); GE40I05-P1J (all purpose).
[8]. Each of the pre/post amplifiers (optional) add about 2W to the module power consumption.
[9]. For USB monitor software please contact us.

30GHz Transmitter/Receiver RF over Fiber Low Noise High SFDR

0.01 – 30 GHz Analog

DATASHEET

Operation Instructions

1. Connect the optical fiber input port on the receiver to the signal source.
2. Connect the RF output port on the receiver to the RF input port of the transmitter.
3. Connect the RF output port of the transmitter to the readout instrument.
4. Plug in the provided power supply to power the device. The LED will turn on (CW for the receiver, blinking for the transmitter).
5. The unit will operate with the performance specified in the test report.
6. If the device does not function as expected, contact us via the sales email. **Do not open the enclosure — doing so will invalidate the one-year warranty.**

Laser Safety

This product meets the appropriate standard in Title 21 of the Code of Federal Regulations (CFR). FDA/CDRH Class 1M laser product. This device has been classified with the FDA/CDRH under accession number 0220191. All versions of this laser are Class 1M laser products, tested according to IEC 60825-1:2007 / EN 60825-1:2007. An additional warning for Class 1M laser products. For diverging beams, this warning shall state that viewing the laser output with certain optical instruments (for example eye loupes, magnifiers, and microscopes) within a distance of 100 mm may pose an eye hazard. For collimated beams, this warning shall state that viewing the laser output with certain instruments designed for use at a distance (for example telescopes and binoculars) may pose an eye hazard.

Wavelength = 1.3/1.5 µm.

Maximum power = 30 mW.
