4-Head Solid-State UV Spot Light

Product Description

The 4-Head Solid-State UV Light uses high power UV LEDs as light sources for curing UV adhesives. Major advantages offered compared to traditional lamp based systems include: long life, low power consumption, and compact size. Our superior optical design achieves high light coupling efficiency exceeding 85% and uniform light spot intensity.

Each head can be switched on/off either individually by front panel controls or simultaneously by an optional foot switch. The cure time and UV output power can be set independently. Each LED head features an integrated cooling fan.
